

The App That Keeps You Connected to Your Business

With businesses connecting more than ever on a global scale, you have to ask yourself, am I providing the best tools for today's dispersed workforce?

Using the Vonage® Business Cloud mobile app¹, your employees can make and receive business calls and messages from virtually anywhere, with full access to the same robust calling features they enjoy in the office. Calls placed through our mobile app always display your business' number in the receiver's Caller ID for a seamless customer experience.

The app lets your employees keep their business and personal accounts separate on the same device, enabling a "bring your own device" (BYOD) policy.

Download the App Now

The mobile app is an included feature you receive when you purchase a Vonage Business Cloud phone system. You can download the app and begin using it today. Your team will enjoy business phone features, wherever work takes them.

Intuitive Tools Empower Workforce Collaboration

Your Business Number Is All Customers Will Know

Call and text on-the-go from your Vonage Business phone number using our iOS and Android apps.

Text From Your Business Number

Send and receive text messages from your personal business number, and manage your "Business Inbox" for messages sent to your main company number. *(Texting supports US & Canada)*

Collaboration Just Got Easier

Collaborate with your colleagues with group conversations, text, media sharing and video calls.

Manage Availability with Call Routing

Vonage "Never Miss a Call" features such as Call Forwarding and Do Not Disturb help manage your time. Play, read and adjust settings for voicemail.

Keep Business Contacts Up To Date

Import, view and edit business contacts and access them within your Vonage Business account.
